Subject: New Vaporizer Accessories - Narkomed 6000 Series

Vaporizer Guard

A Vaporizer Guard is now available as an accessory for the Narkomed 6000 Series system. New NM6100's and previously installed systems can be configured with this accessory. The Vapor Guard is designed to protect vaporizers from damage due to accidental impact with other equipment or objects in the OR.

Depending on the orientation, the Vapor Guard will accommodate both Dräger and Datex-Ohmeda vaporizers. There are two possible orientations for mounting.

- Image 1 shows the mounting position for Dräger vaporizers
- Image 2 shows the mounting position (90° rotation) for Datex-Ohmeda vaporizers

Description: Vapor Guard Kit
Part Number: 4117742
List Price: \$150

Note: Mounting the Vaporizer Guard requires the Left GCX rail, part # 4116582, which is not included in this pricing. The Left GCX rail must be ordered separately.

Vaporizer Parking Accessory

As a reminder, there is a Vaporizer Parking accessory that allows a third vaporizer to be stored on the left or right of the system, mounted from the corresponding GCX rail. This accessory is designed to provide a more accessible parking position for those customers who need to store a spare vaporizer. This is the same Vaporizer Parking accessory that is available on the Fabius GS. However, it can be mounted to either the left or right GCX rail on the Narkomed 6000 series system.

Description: Vapor Parking Kit

Part Number: 4115839

List Price: \$295

Note: Mounting the Vaporizer Parking accessory requires the Left GCX (# 4116582) or Right GCX (# 4116583 or #4116584) rail which is not included in this pricing. GCX rails must be ordered separately.
